

Note:

1. Every student should do task by himself.
2. Task solution generated by ChatGpt is strictly prohibited.
3. Output and code should be clear.
4. Best practices and standard should be followed while writing code.

Objective:

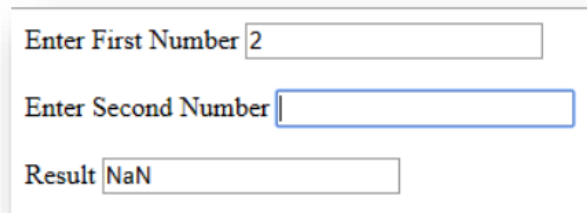

1. Student will be able to use Javascript, popular language in frontend development.
2. Student will be able to use best practices and standards to write code.
3. Student will be able to use Html, Css, and javascript together to make professional web application.

Lab Task(s):

1. Implement the concept as how to place JavaScript in the body section, head section and referencing JavaScript as an external file.
2. Create a function that helps in the addition of two integers.
3. Produce the following

```
x = y + 1 ...Result = 3
x += y ...Result = 6
x -= y ...Result = 3
x *= y ...Result = 9
x /= y ...Result = 3
```

4. Prompt user to input 3 integers and return its sum and average in a dialogue box message.
5. Pretend there are three text boxes. The user will provide integer numbers and the addition of two textboxes will be shown in the third textbox. When the user input an integer in the first textbox, the resultant (third) textbox should display answer as NaN. After providing an input into the second textbox the addition result should be displayed in the third textbox. [Hint: Use Event handling concept] as shown below.

Enter First Number

Enter Second Number

Result

6. Pretend there is a dropdown menu and button against dropdown menu titled as **New Entry**. When the user clicks the button (**New Entry**), the dropdown menu should be replaced with the textbox as shown below.

7. Apply JavaScript validation for HTML form and show red color message against each invalid input field on form submission as shown below in figures.

10. Create “picture album” as shown in figure 01. There will be three categories in “picture album” as:

- Birthday
- Pets
- Cars

When user click on birthday category, picture must be display regarding birthday category and so on. By default, birthday picture must be display to the user or birthday category must be clicked.
